

PRODUCT SPECIFICATIONS

Weigh and Measure Infants in One Easy Motion with Detecto's 6700 Series Neonatal Scales

- Displays weight in brilliant green digits
- Weighs in pounds/ounces or kilograms/grams at the touch of a button
- Locks in weight display, allowing typical newborn movement
- Measures infant's length with built-in measuring tape
- Easy-to-clean

SPECIFICATIONS

Capacity - 6735: 30 lb x .1 oz/15 kg x 5 g	Controls - lb/kg select: provides for the selection of weighing units in pounds and ounces or kilograms and grams
6732: 15 kg x 5 g	Tare/zero button: used to offset blanket or cover weight, allowing display of infant net weight only
Display: 5 digits, 1/2" high, green vacuum fluorescent	Clear weight: display automatically locks weight of infant when motion has ceased; weight remains until the "clear" weight button has been depressed, returning the scale to active weighing
Status indicator: includes center of zero, lb, kg, oz, gram	Operating temperature: 0½ - 50½°C, 32½ to 122½°F
Size: 4 1/2" H x 14 1/2"W x 12"D	Shipping weight: 18 lb
Cradle: 13 1/2"W at top tapering to 9 1/2" at bottom, 22"L	Weight sensor: strain-gauge load cell
Platform material: molded acrylic with built-in measuring tape	Motion detector: senses motion and locks weight display after motion has ceased
Measuring tape: 22"L x 1/4" increments	Color: black case, black front panel with silver accenting, black keypad with silver lettering
Power: 110/120 VAC, 50/60Hz (also available in 220/240 VAC)	
Zero: established on power routine and maintained automatically to ± 1/4 graduation	
Self-diagnostics: power-up sequence provides for self-test of microprocessor circuitry and allows visual check of all display segments and annunciators
